

Working Rolls, Shape Rolls, Mangle Rolls

Efficiency improved by surface treatment:

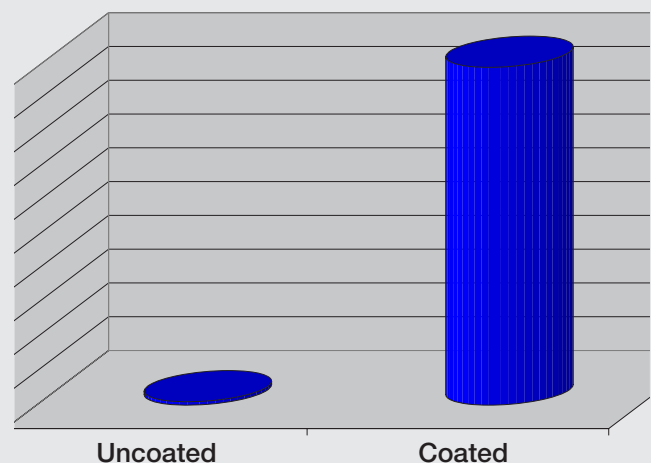

Cleaning interval uncoated:

- **Service life 1 week**
- Weekly grinding of deposits and cold weldings
- Quality fluctuations (embossed pick-ups create negative indentations in the coil)

Cleaning interval coated:

- **Service life 100 weeks**
- Without intermediate polishing of coating
- 2 years constant product quality
- Increased productivity

Service life in weeks

The essential advantages:

- Increasing service life up to 100 times
- Rolling from small to wide coils without changes possible
- Rolling of different materials possible
- Products without contamination by the roll material
- Cleaning of rolls with abrasive paper (without scratches)
- Increased rolling speed
- Significantly reduced wear of roll
- High availability of rolls
